

Sprint Retrospective		Iteration #3					
Context Project	RDB						
Group	Chainable Technologies						
			In hours, per person	In hours, per person			
User Story #	Task #	Task Assigned to	Estimated Effort per task	Actual Effort per Task	Done	Notes	
Build a basic GUI	Research in Android UI testing	Isha	2	2	Yes		
	Send a challenge	Isha	3	2	Yes		
	Add a refresh button to the recent transactions	Isha	2	3	No		
	Create a configuration screen where the user can enter his details	Isha	3	2	Yes		
	Make the toolbar consistent across each activity	Isha	2	7	Yes	Took incredibly long because of build times	
	View a list of the recent transactions	Isha	3	5	Yes	Rest from latest sprint	
	Transitions between activities	Isha	2	2	Yes		
Make a persistent environment #116		Jos	8	8			
Fixing Checkstyle, PMD and FindBugs for Travis #101		Jos, Matthijs	4	2, 22	No	Very broken, trying to find the only working needle in the haystack	
Create manager to do business logic #73		Jos	13	3	No		
Implement Bunq using bank interface #43		Jos, Richard		1,0	Yes	Rest from latest sprint work was split in new stories	
Create banking interface #42		Jos, Richard		1, 1	Yes	Rest from latest sprint	
Implement Bunq get Accounts #86		Richard	5				
	create Service	Richard		3	Yes		
	extend BunqBank	Richard		1	Yes		
	Create and implement interface	Richard		1	Yes		
	Fix compatibility with android 6	Richard		2	Yes		
Implement Bunq get users #89		Richard	3				
	create Service	Richard	1	3	Yes		
	extend BunqBank	Richard	1	1	Yes		
	Create and implement interface	Richard	1	2	Yes		
	Fix header interceptor	Richard	-	4	Yes	was a bug that i created myself	
Extend Get payments #87		Richard					
	Make payments work with users and accounts	Richard	3	3	Yes		
Implement Bunq created payment #88		Richard					
	create service	Richard	2	3	No	Bad requests	
	extend BunqBank	Richard	1	1	yes		
	create and implement interface	Richard	2	2	yes		
Persist Bunq session to phone storage		Jos	20	4	No	Unplanned, planned for sprint 4, started only	
Add Transaction Parser		Matthijs		4	Yes		
API key research #85	Research	Jos	6	3	Yes		
	Create proxy for Bunq #97	Jos	3	3	Yes		
Reviews		Jos, Matthijs, Richard, Isha		3, 1, 2, 1.5	Yes		
Project Related							
Stakeholder meeting	Stakeholder meeting	Isha, Jos, Richard, Matthijs	0.5	0.5	Yes		
Project skills	deliverable 1b	Isha, Matthijs, Jos, Richard	2	2, 6, 4, 3	Yes		
Creating product backlog/planning		Richard	1	1	Yes		
Update Architecture design	document	Jos, Matthijs			Yes		

Main problems encountered								
Building the application takes much longer than expected.								
Description	Especially for the toolbar, I had to build the app a lot of times. It takes up to 5 minutes to build that app, so that results in a lot of wasted time while doing these simple tasks							
Reaction								
A team member did not ever (properly) attend								
Description	We had 20% less possible hours in this week							
Reaction	Mad! Sad :( And now we will, for sure, not plan his hours in.							
Problem 3								
Description								
Reaction								
Problem 4								
Description								
Reaction
